

# Certificate of Analysis(COA)

Issuing Date: 2026.09.20

Version: QR-036-1

Manufacturer Information:

Product Information:

Product Name: Copper Peptide Scalp Concentrate

Model No: AX-GHK010

Manufacture Date: 2026.09.18

Analysis Results:

| Item(s)                      | Specification(s)                                                                  | Result(s)                                                                         | Conclusion(s) |
|------------------------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|---------------|
| Appearance                   | Liquid                                                                            | uniform and fine                                                                  | Pass          |
| Odor                         | Natural                                                                           | Natural                                                                           | Pass          |
| Color                        | Natural                                                                           | Natural                                                                           | Pass          |
| PH value                     | 4.0-8.5                                                                           | 5.58                                                                              | Pass          |
| Heat resistance              | At 45 ° C for 24 h, no significant difference after returning to room temperature | At 45 ° C for 24 h, no significant difference after returning to room temperature | Pass          |
| Freeze resistance            | 5°C for 24h, no significant difference after returning to room temperature        | −15°C for 24h, no significant difference after returning to room temperature      | Pass          |
| Relative density (20°C/20°C) | 1.01-1.05                                                                         | 1.0296                                                                            | Pass          |
| Lead (Pb)                    | ≤10(mg/L or mg/kg)                                                                | 0.02 mg/kg                                                                        | Pass          |
| Arsenic (As)                 | ≤2(mg/L or mg/kg)                                                                 | < 0.005 mg/kg                                                                     | Pass          |
| Mercury (Hg)                 | ≤1(mg/L or mg/kg)                                                                 | < 0.001 mg/kg                                                                     | Pass          |
| Cadmium(Cd)                  | ≤5(mg/L or mg/kg)                                                                 | < 0.001 mg/kg                                                                     | Pass          |
| Total numbers of colony      | <1000CFU/g(ml)                                                                    | <10CFU/g(ml)                                                                      | Pass          |
